A

addvp command 1-6, 1-10

AMC

description of 1-4

IP address 1-34

Apache web server and project

IP Control 8-4

attributes

configured for RADIUS server 2-1

authenticated groups

agent 1-3

application example 1-8

as mobile groups 1-1

Authenticated VLANs client 1-3

AV-Client 1-10

binding policies 1-6, 1-14

client 1-3

configuration 1-6

configuring 1-10, 1-12

default group 1-1

DHCP 1-2, 1-31

Ethernet and Token Ring 1-1

fwd.img file 1-3

log-in banner 1-17

modifying 1-13

port-binding policies 1-2

protocol 1-14

protocols in 1-2

rav.img file 1-3

router service addresses 1-27

secured areas 1-8

server 1-4

unsecured areas 1-8

use with IP FireWall 1-2

viewing 1-13

Authenticated mobile groups 3-3

LDAP Authentication 3-6

Authenticated VLANs client 1-3

Authenticated VLANs Client (AV-C) 3-3

Authentication

Enabling LDAP Authentication 3-12

authentication

current configuration 1-33

disabling 1-36

mode 1-34

modifying 1-34

password 1-35

troubleshooting 1-37

authentication agent 1-3

authentication client 1-3, 1-17

Authentication Management Console

see AMC

authentication server 1-4

Authentication services

Authority modes 3-4

Clients, agents and servers 3-3

How LDAP Authentication works 3-3

AV-Client

configuration utility 1-24

DLC protocol 1-19

enabling/disabling DHCP 1-25

avlAddresses command 1-3, 1-27

avlAuthTime command 2-15, 3-15

avlbanner command 1-17

avlbootpmode command 1-32

avldnsname command 1-28

avlDrop command 2-16

avlLMChain command 3-17

avlLSChain command 3-16

avlMode command 2-9, 3-14

avlPorts command 1-18

avlPrompts command 2-14, 3-14

avlR1Chain command 2-9

avlRadAcct command 2-17

avlRadTimeout command 2-16

avlRadTries command 2-15

avlRMChain command 2-10

avlsaddresses command 1-27

avlsAuthTime command 2-15, 3-15

avlsbanner command 1-18

avlsbootpmode command 1-32

avlsdnsname command 1-28

avlsLMChain command 3-18

avlsLSChain command 3-18

avlsMode command 2-9, 3-14

avlsPorts command 1-18

avlsPrompts command 2-15, 3-15

avlsR1Chain command 2-12

avlsRadAcct command 2-19

avlsRadTimeout command 2-16

avlsRadTries command 2-16

avlsRMChain command 2-12
avlsVersion command 2-16, 3-18
avlsWebPath command 1-29
aviWebPath command 1-29

crgp command 1-12
 authenticated groups 1-6

D

Daylight Savings Time (DST)
 IP Control 8-14
DDNS (Dynamic Domain Name System)
 IP Control 8-26
DDNS Enabled command 8-13
defrsvp command 6-24, 7-4
device authentication 1-2
DHCP
 Address ranges and lease times 8-3
 BootP 8-10, 8-25
 DHCP messages 8-3
 IP Control management application
 Host configuration data 8-10
 IP address ranges 8-10
 MAC address associations 8-10
 Server Manager 8-10
 Subnets 8-10
 IP Control UI commands 8-12
 VLANs (Virtual LANs) 8-3
DHCP clients 8-1, 8-24
DHCP Enabled command 8-12

DHCP server (switch-embedded) 8-1
 Configuration 8-24
 Configuration data 8-3
 Description 8-24
 Lease records 8-2
DHCP Service Manager
 IP Control 8-9
Directory server 3-1, 8-1
 Directory entries
 Distinguished name 8-18
 LDAP Authentication 3-9, 3-16, 3-17
 directory entries 3-10
 LDAP-enabled directory server
 IP Control 8-1, 8-16
 LDAP Authentication 8-16
 Policy Manager 8-16
 server chain 3-16
Distinguished Name (DN)
 IP Control UI commands 8-13
 LDAP-enabled directory searches 8-21
DLC protocol
 for AV-Client 1-19
DNS
 IP Control management application
 Host name to IP address mapping
 8-11
 Network domains 8-11
 Server manager 8-11
 IP Control UI commands 8-13
 Name server records 8-3
DNS server (switch-embedded) 8-2
 Configuration 8-26
 Configuration data 8-3
 Description 8-26
 DNS BIND 8-26
Domain name server 8-2
Domain name space 8-2
dt command 8-14
Dynamic DNS (DDNS)
 IP Control 8-4, 8-13
